

The Benefits of Dri-sump®

Next-generation vacuum testing with Dri-sump® digital technology represents a big leap forward from traditional hydrostatic methods, which contaminate precious water, require cumbersome analog equipment, and can cause hours of disruption for sites and customers.

Is digital containment testing really ready for primetime? With approval for EPA compliance across the U.S., plus enthusiastic adoption by some of the largest, most successful testing companies, fuel retailers, and fleet operators in the U.S., the answer is a resounding "yes"!

Don't just take our word for it. Our customers' comments speak for themselves:

- "This is going to **change everything**."
—Convenience Store Owner (500+ locations)
- "Hydro-testing takes too long. This is so **simple and fast**."
—Major Testing Company / Contractor
- "I didn't believe it until I **saw it work!**"
—Testing Company Owner
- "This is **what we want** for our sites"
—Convenience Store Owner (800+ locations)
- "If I owned tanks, I would **use this method!**"
—State Agency Inspector
- "I can't find any reason not to **test with Dri-sump!**"
—Convenience Store Owner (100+ locations)
- "Finally, something simple, and it **doesn't affect my fuel customers!**"
—Convenience Store Owner (65+ locations)
- "Oh sure, I really want to go back to the old water testing...
are you kidding me?"
—Major Testing Company / Contractor
- "You don't realize what you have done for owners!"
—President, State Convenience Store Association

Dri-sump is helping some of the biggest and best names in the business ensure compliance

while saving time, reducing waste, and providing a better customer experience.

Dri-sump® is the pioneer and leader in secondary containment and spill bucket testing.

Experience the new gold standard in containment testing, and achieve fast, accurate results with minimal disruption or waste.
